Art Unit: 3632

This is the second office action for serial number 09/890,619, entitled Vehicle External Mirror Assembly And Method Of Manufacture, in response to Amendment A filed on July 30, 2003.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 36-45 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lang et al. (Lang) 6,390,634 in view of Herr et al. (Herr) 3,448,553. Lang discloses a vehicle external mirror assembly comprising a head (15), a mirror (16), a mount (1 and 2), a foam core (20, column 4, lines 2ff), a load diffuser (6, 7, 8, 5, and 14), a front and rear shell (18 and 19), a second foam core (30), the stiffness of the diffuser reduces from adjacent said mount (the diffuser changes from two rods (6, 7, and 8) to one rod (14)). Lang discloses all of the limitations of the claimed invention except for the molded thin external plastic body shells. Herr teaches that it is known a

Art Unit: 3632

external plastic shell (12) around a foam core (19). It would have been obvious to one having ordinary skill in the art to have modified Lang to have made the mount and the head of a molded thin external plastic shell as taught by Herr for the purpose of providing a more rigid and durable protective frame.

Claims 46-49, 52-57, 64, and 73-77 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lang 6,390,634 in view of Herr 3,448,553 in further view of Mittelhauser DT 2740189. Lang in view of Herr discloses all of the limitations of the claimed invention except for the rear and front shell meeting at an overlapping joint. Mittelhauser teaches that it is known to have a front and rear plastic shell having an overlapping butt joint (near 7,8,9,12, and 21). It would have been obvious to one having ordinary skill in the art to have modified Lang in view of Herr to have included the front and rear plastic shells having the joint as taught by Mittelhauser for the purpose of providing a better means of attachment for the front and rear shells. Lang in view of Herr in further view of Mittelhauser inherently teaches the method of molding, positioning and retaining, and substantially filling with foam.

Allowable Subject Matter

Claims 50, 51, 58-63, and 65-67 objected to as being dependent upon a rejected base claim, but would be allowable if

Art Unit: 3632

rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 68-72 and 78-83 allowed.

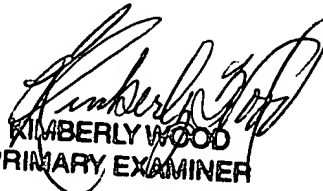

Response to Arguments

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.
